

Year 10 Home Learning – Lines, Angles and Shapes

1 Find x in each figure. Give reasons.

2 Study the triangle.

- Explain why $x + y = 90^\circ$.
- Find y if $x = 37^\circ$.

3 What is the sum of interior angles of a regular hexagon?

- What is the sum of exterior angles of a convex polygon with 15 sides?
- What is the size of each exterior angle in this polygon?
- If the polygon is regular, what is the size of each interior angle?

5 Explain why $x = y$ in the following figures.

6 **a** Measure this line and construct AB the same length in your book using a ruler and compasses.

A _____ B

- At point A , measure and draw angle BAC , a 75° angle.
- At point B , measure and draw angle ABD , an angle of 125° .

7 **a** Construct triangle PQR with sides $PQ = 4.5$ cm, $QR = 5$ cm and $PR = 7$ cm.
